How does "hopinlock-manager" work?

1

STEP 1: INSTALL

Change device settings to enable Apps upload from unknown sources.

9a a` f WS` V fa fZWf ^ai f] fa Vai ` ^aSV Sbb:
<http://hopinlock.com/app/hopinlockmanagerv2.0.apk>

The install will start automatically.

The hopinlock manager App only works on NFC enabled Android devices, and can only be downloaded via the link.

2

STEP 2: ADD LOCKS

You can log in with the account information provided to you.

Identify zones

Identify locks

Start by specifying areas for the application.
The next step is to recognize the locks and select the zones.

1

2

Connected to
mini K10

3

Wait for the
transaction confirmation

3

STEP 3: CREATE TASKS

Create tasks

You can create tasks in your mobile device to open locks remotely, change geotag passwords, settings etc. You can perform these tasks securely without sharing your master password with anyone.

Defined tasks can be seen on "Tasks" tab of the main screen, you can change them if necessary. You just need to bring your mobile device closer to the lock and wait for transaction approval.

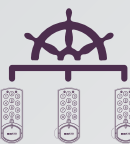

You can access history of last 500 transactions made with hopinlock application

4

STEP 4: MANAGE THE LOCKS

Now,
Your Lockers Security
