

Combi-Cam^{MAX} 7700

Multi-user or single user modes

- Two modes- static or multiple user (locker) mode
- Manager key overrides & discovers code on all locks in installation
- Secure- Ratcheting knob
- Secure- Flush mount install
- Installs in 1/8" to 1" thick material
- 10,000 combinations
- Very competitive price
- ISO 9001 certified
- All metal body

The Combi-Cam 7700 offers maximum security with a ratcheting knob and flush face install, both thwarting attack.

With a flip of a switch, multiple user mode allows each user to enter their own unique code, open the lock and automatically reset for code input from next user. Standard mode would just be one combination.

The manager key works on locks in an installation and it overrides and discovers the code for reset in case the code is forgotten or lost.

Full of features, high security and at a competitive price!
